## Frontend Engineer

+995-551-53-26-30 | [b.zakovinko@gmail.com](mailto:b.zakovinko@gmail.com) | <https://bohdan.sh>

### Summary

Frontend Engineer with 1 year of experience in developing web applications using **TypeScript**, **React**, and **Next.js**, combined with 4 years as a QA Engineer.

Seeking to leverage frontend expertise as a foundation for a career as a Full-stack Engineer, contributing to product development and business growth. Open to relocation within the EU and remote work.

### Skills

JavaScript, TypeScript, React, Next.js, TailwindCSS, HTML5, CSS, ReduxTK, Zustand, React Testing Library, Playwright, Vite, npm/pnpm/bun, Git

### Experience

NDA (Accommodation Unit)

2,8 years Jul 2022 - Apr 2025

*Frontend Engineer (1 year)*

Worked on internal CMS using **React** and **TypeScript**. Deployed updates with **Docker**.

- Built a **Next.js** app to unify accommodation data from multiple providers, giving the content team self-service data management without backend support.

*Senior QA Engineer (1,8 years)*

Led QA for complex data integrations—validating end-to-end flows from raw provider data through Go microservices and gRPC to our search gateway and client apps

- Integrated and validated **4 data providers**; tested a full pipeline rewrite introducing a unified-record model to standardize disparate data.
- Created a detailed document of data provider integrations—including past issues, affected components, and process changes—that **cut extra project time by 50%** and helped developers and analytics plan more accurately.

Yandex.Market

1,1 years Feb 2021 - Mar 2022

*Senior QA Engineer*

Led testing of a high-traffic B2C partner interface for real-time order management at pick-up points, coordinating with sorting centers and couriers to ensure reliable handling of tens of thousands of daily transactions.

- Implemented a “**Zero Bug Policy**,” reducing the time from support request to ticket update and sprint scheduling.
- Led integration testing for the “sorting center” storing feature at pickup-point, validating interactions among couriers, operators, and sorting centers.

AT Consulting

1,1 years Jan 2020 - Feb 2021

*QA Engineer*

Developed automated tests with WebdriverIO, reduced regression time from 25 hours to 5 and speeding up releases.

ECommpayIT

5 months Aug 2019 - Jan 2020

*Junior QA Engineer*

Wrote integration tests in PHP for the API of the banking application (Codeception)

### Education

South-West State University

Sep 2015 - Jul 2019

*Bachelor's Degree, Computer Science*
